

The question your customers ask every day:

Where is my job?

MyTracr gives you the answer — in real time, from anywhere.

No visibility

Jobs tracked in Excel, on paper, in the foreman's head — but not where you need the information.

Phone hunting

Every status request costs time. Asking employees, checking the shop floor, calling back.

Guessing delivery dates

Without machine utilization data, delivery commitments are guesswork. Customers wait.

MyTracr solves the problem

Three steps — and you have complete visibility over your production.

1

Create a job

Customer, due date, workflow — captured in seconds.

2

Operator scans

QR code at the machine. No paper, no typing.

3

You see everything

Live dashboard. Every job, every step, every machine. In the browser or on the phone.

FEATURES

Everything an electroplating shop needs

No unnecessary clutter. Every feature solves a real problem.

V Real-time dashboard

All active jobs at a glance. Status, progress, machine — always current, no asking around.

V Machine utilization

Capacity per machine per day — visible. Realistic delivery commitments at order entry.

V Mobile app for operators

Scan QR code, check in and out — even offline. Runs on any smartphone, no installation.

V Complete order history

Who did what, when, from which device. External manufacturing tracked too.

V Real-time communication

Instructions to production, feedback from production — simple, secure, transparent.

V Built-in calculation

Cost calculated automatically. Markup via slider. Quote price instantly available.

V CEO app

KPIs, approvals, overdue jobs — from anywhere, in two clicks. More time for family, friends and hobbies.

V Secure & GDPR-compliant

Each company fully isolated. Cloud hosting in Europe or local installation. Your data is yours.

BUILT FOR

Contract electroplating

MyTracr was built from the ground up for electroplating shops — with the processes, machine types and workflows you know every day. No generic system that needs to be painfully adapted.

GETTING STARTED

No investment. Just a fair subscription.

No upfront investment. No installation fee. Cancel monthly.
